Wet Cleaning Thins Cotton Wash Dresses

Some cotton wash dresses will not wash satisfactorily — for instance those which will shrink a good deal, or those with colors that aren't fast. In the long run, someone do not dry clean very satisfactorily, but your dry cleaner has another trick up his sleeve which is neither washing or dry cleaning—that is, wet cleaning. In wet cleaning, special soaps and lukewarm water are used. The garment or fabric is laid out on a board and brushed by hand gently. It is also important that the process be completed quickly. This is quite different from the lengthy treatment which warmer water involved in washing. Even boiling fast colors can often be handled satisfactorily under these circumstances.

Dressmakers can take a tip from the dry cleaner to keep wash clothes in condition between washing, or postpone washing or pressing when the garment is only wrinkled, by sponging lightly immediately or removing.

Transport Differs

On water as on land, all kinds of methods of transportation are found among the republics to the south. High up on Lake Titicaca, 12,500 feet above sea level, sail traditional "totora" boats, named after the reeds from which they are woven. These boats of "balsas" glide along under sails also made of totora. Along river boats, ocean-going freighters, and barges are other links of Latin America with the world of commerce. On the rim of the continent are great ports at whose modern docks ocean liners load and unload precious merchandise. Above it all is the network of sky lanes, with hundreds of passenger and freight planes built for safe, swift travel of the Americas. Trips that used to take many days or even weeks can be made in an hour or two. From Mendoza, Argentina, planes make the hop over the Andes to Chile. From La Paz they run regularly overland to Sao Paulo, Brazil. From Barranquilla, Colombia, flying over the Caribbean to Havana and Miami, Fla., are more than 320 miles of air routes in 20 Latin American countries. Even though the Latin American lead in the air field of transportation is formidable, it was largely created by the same American spirit of cooperation the Americas have and can accomplish what might have been a German possession.

Dimitro Dust

Dimitro dust has been proven very toxic to chinch bugs and kills them on contact. It is also effective in keeping those which will shrink a good deal, or those with colors that aren't fast. In the long run, someone do not dry clean very satisfactorily, but your dry cleaner has another trick up his sleeve which is neither washing or dry cleaning—that is, wet cleaning. In wet cleaning, special soaps and lukewarm water are used. The garment or fabric is laid out on a board and brushed by hand gently. It is also important that the process be completed quickly. Vera

Vera, July — Miss Catherine Page, of Lynchburg spent the week end with Miss Rose Page.

Miss Maude Chernault, of Lynchburg spent the week-end with her parents, Mr. and Mrs. J. Chernault.

Mrs. Maude Arthur has returned home after spending awhile with her sister, Mrs. [illegible] Harvey, of Richmond.

Mr. and Mrs. Ed Blackwell, of Lynchburg spent the week-end with her parents, Mr. and Mrs. J. Overton.

Mr. and Mrs. Kirk Marshall and daughters, of Lynchburg, spent Sunday with Mr. and Mrs. L. A. Coleman.

Miss Florence Robertson has returned home after spending awhile with her sister in Baltimore.

Mr. and Mrs. Clem O'Brien spent the week-end with Mr. and Mrs. W. B. Page.

Mr. and Mrs. Spencer Garrett, Jr. and son, Harold Garrett, of Baltimore spent the week-end with Mr. and Mrs. Spencer Garrett.

Dicky and Shirley Perkins have returned to Richmond after spending a few weeks with their grandmother, Mrs. Lucy Perkins.

Oakville

Oakville, July 4.- Dinner guests of Mr. and Mrs. T. G. Marsh Sunday were Mrs. Minnie Thomas, Mr. and Mrs. J. H. Bohannon and children and Mr. and Mrs. N. H. Cooper and daughter.

Mrs. Harry Lucado and children spent last week-end at Cifax, Va. with her parents, Mr. and Mrs. Donald Hamilton.

Misses Barbara Smith, Audrey Bergman and Lillian Hawley spent last week-end with and relatives here.

Miss Mildred Smith left Tuesday for a visit with Mr. and Mrs. J. H. Moore and family in Enon.

Mrs. C. F. Moore left Tuesday to spend several days with her sisters, Mrs. India Scott and Miss Pearle Coleman in Richmond. Her sister, Mrs. Florence Clements, who has been ill in a hospital there for several weeks, died Monday evening at 8:30 o'clock.

Much damage was done to several homes in the community Monday afternoon, when a storm blew down trees, uprooted houses, damaged crops and killed livestock. Eight large trees, one of them a walnut about a hundred years old, blew down in the yard of Charles H nry Coleman. The only damage done to the house was that a large part of the roof was torn off. Less is McCormick's roof was torn from his house and also a part of the roof from a colored man's house at Mrs. Benny Wheeler's place. That same afternoon William Harvey lost two fine cows by lightning.

Richard Smith, Jr. is spending this week with friends at Ocean View.

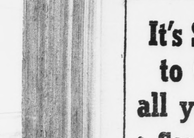
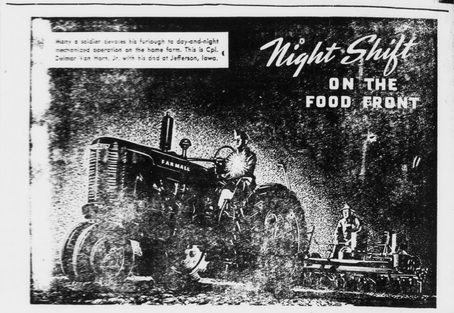
It's Smart to Can all you Can!





THEY DID IT BEFORE—
THEY CAN DO IT AGAIN
With Farmall Tractor Power

THROUGHOUT the Spring, from the Rockies to the Atlantic, millions of worried farmers searched the skies for signs of clear weather, but the cold rains fell relentlessly.

For more than a month the seed should have been germinating in the warm soil. Millions of acres lay unplanted because the ground was too wet for germination of the seed bed and too cold for germination of the seed.

Only a generation ago there could have been but one outcome—crop shortage and food scarcity. Failure always set that date for planting when the warm sun waits till late May or June before drying the soggy soil. Horses are too slow and are too quickly worn out to get this job done then.

But the farmers remember May of 1943—only two years ago—when their fast, untiring tractors averted crop failure. Then, too, rains flooded the fields and Mother Earth was all but spent before they could get in on the land and work it.

In 1943, most farmers drove their tractors from dark to dark, and longer. Many planted around the clock, working in two or three shifts. They made one of the greatest crops in history.

In today's war-torn world—with hunger and disease already stalking many peoples—even one major crop failure could bring famine. This is why the sound of tractors and planting machinery was heard, day and night, from the Plains states to the Eastern seaboard—why headlights stabbed the darkness over the fields.

America's farmers are doing it again, in spite of an unprecedented combination of adverse circumstances—bad weather, shortages of machines and shortages of manpower. For the second time in three years, they are relying upon their tractor-powered machines to help rescue large areas of the world from catastrophe. More of these tractors are products of International Harvester than of any other company.
